prandikagaluh@gmail.com

SUMMARY

Product Designer with **3+ years of experience** in product design, UI/UX, and frontend development, creating mobile applications, web applications, and websites for **startups and international clients.** Experienced in designing intuitive interfaces, building scalable design systems, and developing functional digital products. Skilled in **bridging design and engineering** to deliver seamless, responsive, and visually refined digital experiences

EXPERIENCE

Freelance Sept 2023 - Present
Product Designer & Engineer Remote

Designed **mobile applications, web applications, dashboards, websites,** and translating complex product into intuitive user experiences and polished interfaces.

Collaborated with **US-based startups, including Sentience AI, Unseen AI, Analogue, and Inflight,** across product, web, and digital design projects.

Designed, developed, and launched websites, web applications, and dashboards using **Figma, Framer, Next.js,** and other tools, bringing ideas from initial design to fully functional digital products.

Collaborated directly with **startup founders and product leaders,** including **Brian Norgard (former Tinder CPO),** to design and refine digital product experiences.

Kree8 Studio Jul 2025 - Oct 2025
Product Designer India, Remote

Designed **high-fidelity interfaces and user experiences** for mobile applications, web applications, and websites across multiple client projects worldwide.

Built **scalable design systems and reusable Figma components using Auto Layout** to maintain consistency across product interfaces.

Created **interactive prototypes** to communicate user flows, interface behaviors, and product interactions, ensuring a seamless and intuitive user experience across digital products.

Collaborated with a **remote design team** to refine product interfaces, incorporate feedback, and maintain design quality across projects.

SKILLS

Design & Prototyping

Figma, Paper, Framer, ProtoPie, Affinity, Adobe XD, After Effects, FigJam, Jitter, Miro, Whimsical

Technical & Languages

Typescript, React, PHP, HTML, CSS, SQL, Next.JS, Astro, Linear, Slack

EDUCATION

Universitas Indraprasta PGRI Sep 2022 - Sep 2026
Bachelor's Degree in Informatics Engineering Indonesia

Thesis — **Employee Certification Decision Support System:** Designed and developed a web application for **PT Mega Auto Finance** using PHP, MySQL, and AHP, analyzing **100 employee** records to identify **46 priority cases.**

Academic Fieldwork — **School Cooperative Management System:** Collaborated with university teammates to **design and develop** a Java-based system for **SMP Negeri 23 Depok,** from requirements analysis to implementation.
